Para este proyecto, necesita madera natural natural Three and a half to four inches in diameter. You may have a branch in the back that you can cut with a saw of mitras, if you do your own wooden slices. I recommend that you cook your wooden slices in the oven for an hour at 220 °F so they are ready to decorate. If you can't cut your own wood slices, don't worry, you can buy slices of the exact size you need for ornaments, precuts and pre-cuts to hang! I have this pile of Amazon slices (see list of materials below), and can also be found in craft shops. I recommend that you use paint or varnish to cover and protect your wood slices, as it will facilitate the application of your vinyl decorations. You can use acrylic paint or brilliance varnish in your wooden ornaments. To decorate your wooden ornaments, use permanent adhesive vinyl "Ã la s magnetm using black and white vinyl in this tutorial. You will also need a little standard grip transfer tape to get vinyl on your wood slices. You can also use thermal transfer vinyl (hero over vinyl) if you prefer. Finally, but no less important, you will want a way to hang your wooden ornaments, you can dress them with a nice tape or keep the rustic look with a simple thread or string. The tools used for this project include a way of cutting your designs if I recommend a cutting machine like a Cricut. If you decide to paint your wood slices, you'll want something to hold your paints, a cloth, a cup of water and a large and small brush. Apart from that, all you need are some cute designs to put in their ornaments. You can design your own decals, or use my designs! I have prepared eight fun holiday designs so you can use it for free. So let me show you where to find free designs for theseWooden, and then I show you how to cut them and apply them! Read Read full disclosure policy. Materials to Make Wood Ornaments How to Make Wood Ornaments First, download Design #256, which is my free SVG/DXF/PDF wooden ornaments from my free resource library. If you are going to cut it on your cutting machine, upload the file to your design software.This is what the SVG Wood Slice Ornaments file looks like in Cricut Design Space.Tip: If you're not sure how to upload an SVG file to Cricut Design Space, check out this helpful training video series I made. If you're on an iPhone or iPad, here's how to download and upload SVG files to the Cricut Design Space app.STEP 2: PREPARE YOUR WOOD LICESGrab your wooden ornaments, a cloth, something to hold your paintings, a cup of water and a large and small brush No.The wooden ornaments come dusty from the bark, and pieces of wood to immerse a damp cloth in water and clean the surface of the ornament from the wooden slice.You can paint your wooden ornaments with regular acrylic paint. Red, green, white and black are great choices, and you should feel free to keep some unpainted to show off the beautiful natural wood. To paint them, take a small brush, dip it in water and start painting around the outside of the wood. Dip the brush often in water to help the paint flow, but don't leave the brush too wet.He continued to paint around the ornament of the woodcut.Grab a bigger brush and start painting the interior of the wood chunk. Paint your brushstrokes with the grain of the wood. Repeat this process for the different paint colors you choose to paint your wood slices.We also invite you to varnish your wood slices in advance! Just make sure to do it after your acrylic paint has dried.Step 3: CUT THE ORNAMENT DESIGN!et me show you how to cut vinyl ornament designs into a First, upload the SVG cut file you downloaded in step 1 to Cricut Design Space. If you are not sure how to unzip and load SVG files, SVG files, Look at my SVGS made of simple training series at Jennifermaker.com/svgsonce has raised the designs in the Cricut Design space, decide if you want any of the designs to be cut into a different vinyl color. I think the black and white vinyl are good options for most of the ornaments, but you can decide! To change the color of a layer of designer, simply select a layer by clicking on it, go to the color box at the top of the screen and click on it to choose a new color. However, the designs of wood slice ornaments are adjusted to adapt to the natural wood ornaments in the project materials, however, it is always a good idea to measure the size of their ornaments, since they could be slightly different and you may need to change the size of this SVG, see my size change guide at jennifermaker.com/resizingguideif that you want to cut different vinyl colors at the same time, which is a huge timer savings, take a look to my Cricut shortcut on how to cut more than one color of material at the same time at jennifermaker.com/shortcut1 When you are ready to cut your project, click (which means from backspace down) on your mat cut. You do not need to reflect the adhesive vinyl. For your designs to have cut, the brush of design with a brush tool and place a piece of standard grip transfer tape on top. Point 4: Decorate your wood cut OrnamentSince Your painting and / or Barnish has been completely dried, it is ready to add the designs of wood cut ornaments that you cut and undone in the previous step. Collect the design that already places on the transfer belt and place it in the ornament, taking care by focusing the designer of the way you want. When I have the design where you like, press, smoothing from the center towards To minimize any bubbles or wrinkles. Use a scraping tool to adhere vinyl to wood slice ornament very well. We do not want you to fall or peel peeling Remove the transfer tape. It should come out right, but if you have a problem, go slower and use the tip of your undo tool to help you keep the vinyl in place as you go. This is what looks like the cheerful and bright design on a wooden slice ornament. Painted with ruby red metallic paint. Continue adding the designs to the remaining ornaments! This is the fun part! You can use a gloss varnish to seal the vinyl on the wood slice. You don't need to seal the vinyl: it's up to you! To seal your ornament, simply pour a quantity of quarter size varnish into the ornament, and use a brush to spread the varnish over the ornament. Continue to apply the varnish to the remaining ornaments. To make your wooden trims dry, add a piece of chain or ribbon to hang on a tree or package.Step 4: Show him that's how it is, how to make the wooden cut ornaments! These aren't so cool! I think I love the graffiti the best! FontSall of my slice wood ornaments are handy with handy letters with the exception of Jingle Bells, which is FontdnerdotCom and believes it is Coconut Mirangue.AckOnmentments by Wennifermer Design Fairy Team, specifically design Caitlin, for helping me design and assemble this amazing design. Answers to your questions about how to make wood trim trim Q: Does the varnish make the trim waterproof and keep the vinyl coming out? The permanent vinyl, which is recommended for this project, is very durable! I recommend paint or varnish before applying the vinyl because it will make the wood surface soft, which is what the vinyl needs to stick well! Many people also choose to apply a sealant afterwards, which would probably help with the waterproof look, but if you're worried about the vinyl coming out, you shouldn't, if you follow the instructions! Q: Can you use MOD PODGE instead of the varnish? Q: Can you use Cedar instead? Yes, any wood should work! Cedar would be very beautiful! Q: Can you? Can you? spray paint instead of acrylic paint? You can, but you will have to be very careful not to paint the natural wooden sides of the ornament! You'll have more control if you can paint with a brush on this project. Q: Do you need to sand the wood first? If you're buying them from a store, you don't need to sand them, but if you're making them fresh cut wood, then you'll have to sand them to soften them.
