Warning: Can only detect less than 5000 charactersAnd his success certainly can't be left to chance. Many factors have contributed to this successful digital transformation including strong organizational commitments, talented technical skills, alleys of a doubt qualitative research and a lot of planning! A would like to share with you my experience at the guidance of the digital transformation of the business process for managing and disseminating NYCA s resolution zoning. For a little context, the resolution zoning text (ZR) is the legal instrument to regulate and establish limits of acceptable use of land and buildings in New York. The first ZR adopted in 1916, grew from a simple 14 pamphlet pages to a bulky, 1700+ double-column book page that does not adequately realize a 21st century the vision of a New York for all two columns Book ZR resents.The (affectionately known as tablet moes in some environments) were sold for around \$ 700 for the book; Often engineering, legal studies and land use developers. Once the changes to the resolution zoning are passed by the Municipality, it is up to the construction department to enforce as part of its authorization and control processes. Meanwhile, most New Yorkers were unable to easily access the last resolution zoning. In the summer of 2017, urban planning (with the OMB permit) has decided that we need to go digital! The Agency wanted to switch to digital for many reasons a cost, transparency and timely updates to name a few. With the decision to switch to digital, the agency has also decided to stop producing paper copy of the New York zoning resolution in December 2017; This is a cost savings for agency.unlike previous attempts in à €
