Fallout shelter guide reddit

Fallout shelter guide 2020 reddit. Fallout shelter room guide reddit. Fallout shelter online guide reddit. Fallout shelter beginners guide reddit.

Last updated: Due to reddit's post size limit, I'm about to start working on a wiki for the sidebar. Please be patient while working on this. First off, I know Android people, it sucks. You'll have it, give me time. If you want to ruin everything, read on. If not, come back later! So the purpose of this thread is to discuss the strategies and tips you've found to help your vault grow. I personally made a vault that failed in the first 12 hours because I didn't have a science lab installed, but I learned from that experience. Then I created a second time with the verification that power was the most important room (because it is), and then as soon as a scientific laboratory was ready, I made one. Since then it has been amazing! However, I have not seen anyone else who has played constantly post anything, so here goes: The basics Every inhabitant has a SPECIAL status, very similar to those in relapse. They seem to fit into an order like this (which I will update according to the results): S - Strength: Strong inhabitants in S are specialists for power P - Perception: The strong inhabitants of P are specialists in water production E - Endurance: Strong inhabitants in E are great explorers. These people should be the wasteland wanderers (not to be confused with fallout 3's Lone Wanderer). They also have an affinity for making Nuka Cola at the establishment at the end of the game. C - Charisma: The strong people in C are the ones you want in the radio station, while bringing wandering people from the wasteland. They are also people you want accommodation as they will reproduce faster. Breeders need high statistics, to learn more about the next edition. I - Intelligence: The strong people in I are the researchers. Put them in the lab Or in the scientific center. A - Agility: these guys know how to transport food. They belong to the canteen. L - Luck: luck is a state that does not have a job I found (update if if otherwise). However, the luckier people improve the rainfall. It also helps people who are exploring to find better objects. Come on, special statistics will only be listed by letter!

Staying alive: your residents can hurt you from the attacks of Roach Rad Raids, and radiation. Keep the stimuli in expensive productions to help them heal. However, the radiation is always filtered and will harm everyone. Remember that when you use a scent, it will not heal the inhabitant. They heal very slowly over time if you don't have the stimuli to spare. It also levels the inhabitant, but it does not get rid of radiation. Like earning objects: hoods are currency, that's what you use to buy new rooms and upgrade them. They are mainly earned through daily missions, but they appear in the lunchbox. Even every time a resident levels up, you get a small amount of hoods. The game has two methods to get objects, lunchboxes and a wasteland exploration. The exploration requires someone with high and statistical, but they can find some treasures. u/ Alcohol superhero says I should be tall too. I agree, but especially early in the game, you want your highest and be the explorer until you have a better option. The second method is lunchboxes. These contain four cards that have a mixture of stoppers, the three priorities (explained below), clothes and weapons. They also contain rare characters who were NPC of the failed games. NPCs have high special statistics, use them where appropriate. If you've ever played Hearthstone, it's a bit like opening a deck: there's always a rare or better one. Note: lunchboxes are available through this game or a real money purchase. Buy if you want, but I'm not gonna argue about spending real money. They're important. They're important. People in the vault! For example, military fatigue gives s + 3. Put it on your kids in the power generator and produce energy accot, oizaps ereva id orucis tes non es onimbab li rep artie oizaps ereva id itarucissa ,atnici etnatie nu iah odnauq ,e aznats arde'nu ni onoroe ,rediar occatta nu o dar oiggaracs id occatta nu ,oidne'ni nu 'Ac es ,aivattut ,eramoizuf aro'cna onosop -azzadivary ni linatiba ilged acinacem allus atoN .inimbab ivoun 6 id atadno'nu a ottepsir eritseg ad elicaf 'Aip 'A atlow alla inimbab 2 id etnatsoc ossulf nU .opolc nu onnaribus esrosir eut el .?Arep moob ybab nu ereva non id acreC .esrosir eut el ovoun id eratemua id ongosib iah odnauq olos itamreF .enoizalopop al odnatnemua etnemetatsoc iats idniuiq ,otrauq nu ni aipoc anu ermpes ereva id oilginoC .iuq senorHT fo omaG ad reisaC id otnemetnam li eralume ioup noN .ovitatiba ereitrauq ovoun nu ierc odnauq eralimaf anetac alled irouf id la enosrep id ongosib iah idniuiq ,onnarrudorpir is NON ailgimaf alled irbmem i ,aivattut ?)ocoig otseug ni asoc anu 'A aimagilop al(orol ettut rep oizaps 'Ac es ireitrauq issets ilgen ennod 'Aip a emes ous li .Arednoffid ozzagar nu ,etnemanartS .-Al otnemilaf id Atillibissop 'Ac non ,ermpes .Ardacca .otta' onnaraf ,itunim ihcop opod ,e oiggolla nu ni annod anu e omou nu itteM .osses li osrevartta 'A onU .enoizalopop al eratemua rep idom inucla onos iC :enosrep el onogetto is emOC .ocatta e etulas 'Aip onnah inoderp e iggaracs ©Añciop ,ihcatta ilg rep idnary 'Aip imra id ongosib iah ,ocoig len itnava 'Aip .onnaf ehc occatta'lla egnuiqga S al ©Añciop ,ollevil otla id izzagar us ilaiggapiuqE .ocoig led oizini'lla itneced imra erinof onosop itrotarolpse ilG .dar iggaracs e inoderp ad uaevac li erednefid rep enosrep id ongosib iah ,ollevil id ilas ehc onam nam .Jero emirp el ortnet ocoig led oizini'lla itatropmi onos non es ehcnA :imrA .ecolev 'Aip atnevid oroval li onocsinif iuc noc .Atiolev al e onavort is iuc ni aznats allen atairporppa actisitats al noc arutazzerita'l itteM top left to view the list of a 11. It will say x/x. If you are at your maximum in the room, you will not have the baby until there is space. It usually takes three to four hours in real time to have the baby, and the same The child to become an adult.

The other primary way is the radio room. Put a couple of people with high C to radio, and they will have the chance to have another person from the scope of the desolate land to the door. Luck also increases the possibility. The last way is through LunchBoxes. Include ordinary people or rare people, some of which can be recognized. The order of importance: power is priority. I can't stress this enough. Without power, all other rooms cannot run. Power plants must have stronger people. The day is the second in my opinion at the moment. Without food, they die. Of course, without water they also die, but the water is also essential for much more than ingest. Thus, the water is the third of the list. Ways have the person with higher and statistic explorer, as soon as the game starts. You need to find weapons. Keep an eye on and pull them back often using the call until you feel at ease letting them out according to the gears they equipped. You have to use what they find. Every few hours pull them back and then send them out. As soon as the Baia Med is available, put someone with the top. Secondly, put someone with Alto I also in the science laboratory, since at this point people will begin to hear the radiation from the desolate. Inreing the workshops to open, leave the couple in the living quarters that the tutorial set. They are baby makers. It's okay of their statistics suck, which will be solved later. Whenever the game says you need a new life neighborhood, make a new level for this. Dedicate that level to live the space. After the laboratories are set up, the radio opens to try to take people from the desolate. Put the à €
