Isdt battgo bg-8s battery meter manual

I AM Building 2 8S 24V LFP batteries using generic 8S LFP BMS that do not include monitoring. I bis not intention of continuous monitoring unless you think I want to have the chance to monitor the monthly cells, mainly to keep track of correspondence and misalignment / drift that develops. IA D They prefer not chewing charge for 99.99% of the time I wona to be monitoring, so a single monitor that can be connected to a 9S wiring cable would be a captivating solution. There are low-cost 8s monitor members here can advise? Ideally, with easy possibility to buy multiple cables. Alternatively, I could consider a wireless monitor for each battery if the current absorbed standby is sufficiently low and the cost is reasonable. Therefore, all recommendations on strategies for monitoring 8S LFP batteries and recommended budget products, both wired or wireless, appreciated. Appreciate the recommendation, but Overkilsolar seems to sell BMS only with integrated Bluetooth monitoring. For my next battery I can consider that, but I already got a 8S 200A BMS vanilla on my battery (whose cost
