# Eye is burning and sore

Saturday night I had a bad step and something is popped at the back of my knee articulation and I couldn't hurt really badly. Sunday morning I had to use a rod to walk but it hurt to bend that leg. I frozen it and I kept it high as possible. At 630 I am this morning I woke up and seemed to me the inside of my knee was in flames and the back of my knee was very red. I took the tylenol arthritis and burning and the redness left but scared me. HomeConditions A-Z eye conditions of Amy Hellem; Reviewed by Gary Heighting, or burning eyes can have several possible causes, ranging from simple to complex, and burning sensation can occur with or without other symptoms such as itching, eye pain, watery or discharge eyes. I attend, burning eyes are caused by inevitable environmental influences, such as strong winds or high pollen counts. However, similar sensations can be symptoms of a more serious eye problem that requires medical treatment. To select appropriate treatment, it is important for the first time to establish the cause (or causes) of your eyes on. Causes of pungent eyes Sometimes it's easy to say what an eye is causing. For example, your eyes could burn if you get chemicals in them, like shampoo or air conditioner, chlorine from a pool or sunscreen. Other common irritants that can burn your eyes include makeup, moisturizers of the skin, soap and cleaning products. Diurning eyes can have many causes. A journey to the ophthalmologist is the best way to get relief. The goals in contact with long periods of time can also burn the eyes. Even burned eyes can derive from environmental irritants such as smog, smoke, dust, mold, pollen or pet hair. If you are allergic to any of these substances, they are even more likely to burn your eyes. However, even the "clean" air can burn the eyes, especially when it is particularly hot, cold or dry. Even if you get something in your eyes can make them burn, burn your eyes sometimes report a serious eyeiece condition. For example, the conditions such as eye rosacea, dry eyes and blepharite can cause symptoms of burning eyes. Actually, all that causes inflammation can create a burning sensation. Ocular allergies, as well as bacterial and viral eye infections can cause inflammation that leads to burning eyes. Even a common cold or influence can burn the eyes. Rare cases, burning eyes can be a sign of a serious view or a dangerous condition for life Orbital uveitis or cellulite. Often, burning eyes occur next to other symptoms that can give your indications optometrists on the root cause of your discomfort. For example, when the eyes burned with itching, it can signal allergies; Or if you have combustion and discharge of the eyes, this could mean an infection. How to get relief from burning a domestic product that gets in your eyes and causes burn, the first thing you should do is check the product label for specific instructions. In many cases, you will be able to rinse your eyes quietly Relieve the burning sensation. For example, children and adults often get sunscreen in their eyes during the hottest months. Although burning or burning can initially be significant, gently rinse with eyes with clean water often provide quick relief. If you are a sick of allergy, the doctor (GP) or your doctor (GP) or your optometrist can prescribe specific eye drops that can minimize the combustion that can minimize the burning experience during the allergy season. These drops differ from oral allergy medicines, which can sometimes cause their eyes to burn them. If you are taking an allergic drug, or any other drug that you think is to burn your eyes, make sure you discuss your concerns with your optometrist before stopping use. During eyes caused by a dry eye condition can usually be relieved with frequent use of drops of lubricants (also called artificial tears). When selecting a brand of artificial tears, consider one that is free of preservatives - in particular if you plan to use the drops frequently. If your discomfort continues, let your optometrist know, since there are other treatments for dry eyes that could be more effective and also help to relieve burning eyes. Cool compresses delicately applied over your closed eyelids can help To soothe burning eyes. When to see an optometristif your burning eyes are accompanied by pain or excessive sensitivity of light, or if you have some eye discharge, blurred vision, floater for eyes or flashes of light, double vision or other unexpected symptoms, immediately contact your optometrist For immediate attention. If none of these additional symptoms occur, you need to contact your optometrist if your eyes continue to burn more than a few days.
