What is sustainable economic growth

Human development methods Sustainable development scheme: at the confluence of three constituent parts. Sustainable development is an organizational principle to achieve human development goals and at the same time supporting the capacity of natural systems to provide natural resources and ecosystem services on which the economy and society depend. The desired result is a state of the company in which the living conditions and resources are used to continue to satisfy human needs without compromising the integrity and the stability of the natural system. Sustainable development can be defined as a development that satisfies the needs of the present without compromising the capacity of future generations to satisfy their needs. Sustainability objectives, such as the current objectives at the United Nations sustainable development, addressing global challenges, including poverty, inequality, climate change, environmental degradation, peace and justice. While the modern sustainable development concept is largely derived from the 1986 Brundtland report, but it is rooted in the previous ideas on the sustainable management of forests and the environmental concerns of the 20th century. Because the concept of developed sustainable development has moved its more attention to economic development, social development and environmental protection for future generations. The concept of sustainable development has been, and is still a matter of criticism, including the question of what must be sustained in sustainable development. It is claimed that there is no such thing as a sustainable use of a non-renewable resource, since any positive exploitation rate at the end will lead to the finished warehouse exhaustion; [1]: 13 This perspective makes the industrial revolution as a whole unsustainable [2]:. 20f [3]: 61a 67 [4]: á €
